

# Pl@ntNet-DataManager

## Gestion distribuée de données de biodiversité

Samuel Dufour-Kowalski - UMR AMAP

Projet Pl@ntNet

- \* Le projet Pl@ntNet
- \* Pl@ntNet-DataManager
- \* Exemples de cas d'utilisations
- \* Limites et perspectives

Projet 2009-2014

“Identification interactive des plantes  
et Système d'information collaboratif”

Fournir des outils numériques pour la découverte et le partage des connaissances botaniques

## Aide à l'Identification des plantes

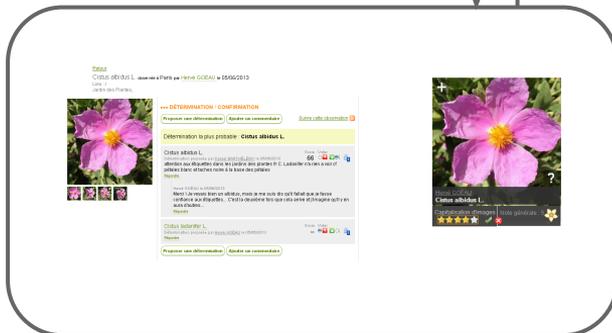

## Stockage "Big-Data"

## Gestion de données

## Validation collaborative

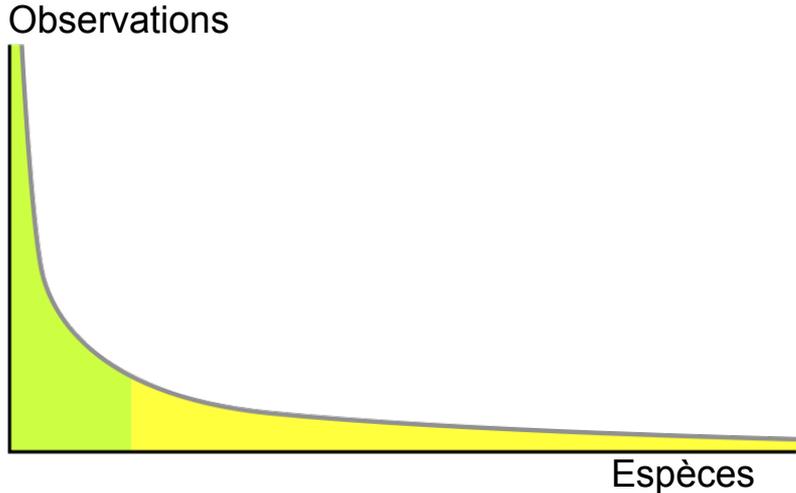

IdentiPlante / PictoFlora

Pl@ntNet-Publish

# Des “données orphelines” ...

La masse des données botaniques concerne une minorité d'espèces. Comment en acquérir ou en mobiliser de nouvelles ?

## Problèmes identifiés :

- *Les données n'existent pas*
- *Les données existent mais ne sont pas valorisées*

# Pl@ntNet-DataManager

Collecte, gestion et diffusion collaborative  
de données en écologie et en botanique

## Objectif :

*Fournir une plateforme de gestion de données générique  
pour les **petits projets de recherche indépendants**,  
facilitant l'échange et le partage.*

# Les données de botanique

Centrées Individus ou Taxons

Observations Botaniques

Images / Documents

Des référentiels

Taxonomiques (famille, genre, espèce...)

Geographiques (pays, region, lieux...)

Auteurs

**Structuration Hierarchique des données**

Informations spécifiques selon les besoins

*Etlingera elatior* (Jack) R.M. Smith par Inge WULLWEBER

# Des données pour la recherche

Favoriser l'agrégation et le partage des données, dans un domaine où la dispersion et l'hétérogénéité des sources prédominent

Projets de petites tailles (quelques personnes)

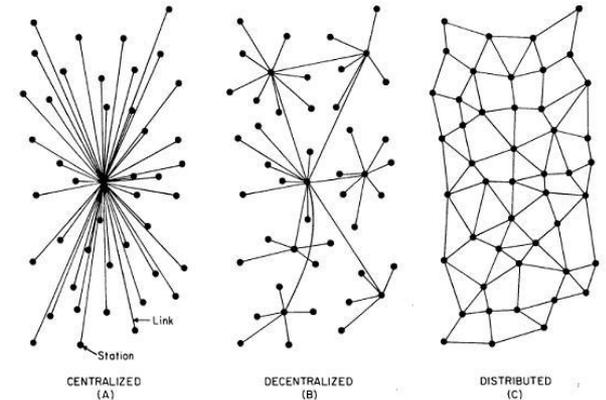

Pas de standardisation

(1 projet = 1 problématique = 1 modèle spécifique)

Pas de SI centralisé

Chaque groupe veut gérer ses données indépendamment

Echanger tout ou partie de ses données avec ses partenaires

# Une nouvelle approche...

Les technologies **NoSQL** pour

**Structuration souple des données**

**Distribution des données**

Adapté si

**Pas de contraintes de transaction**

**Peu de relation entre les données**

**Pas de requêtes SQL**

## NOT Only SQL

*It's about recognizing  
that for some problems  
other storage solutions  
are better suited!*

# Echange / Synchronisation

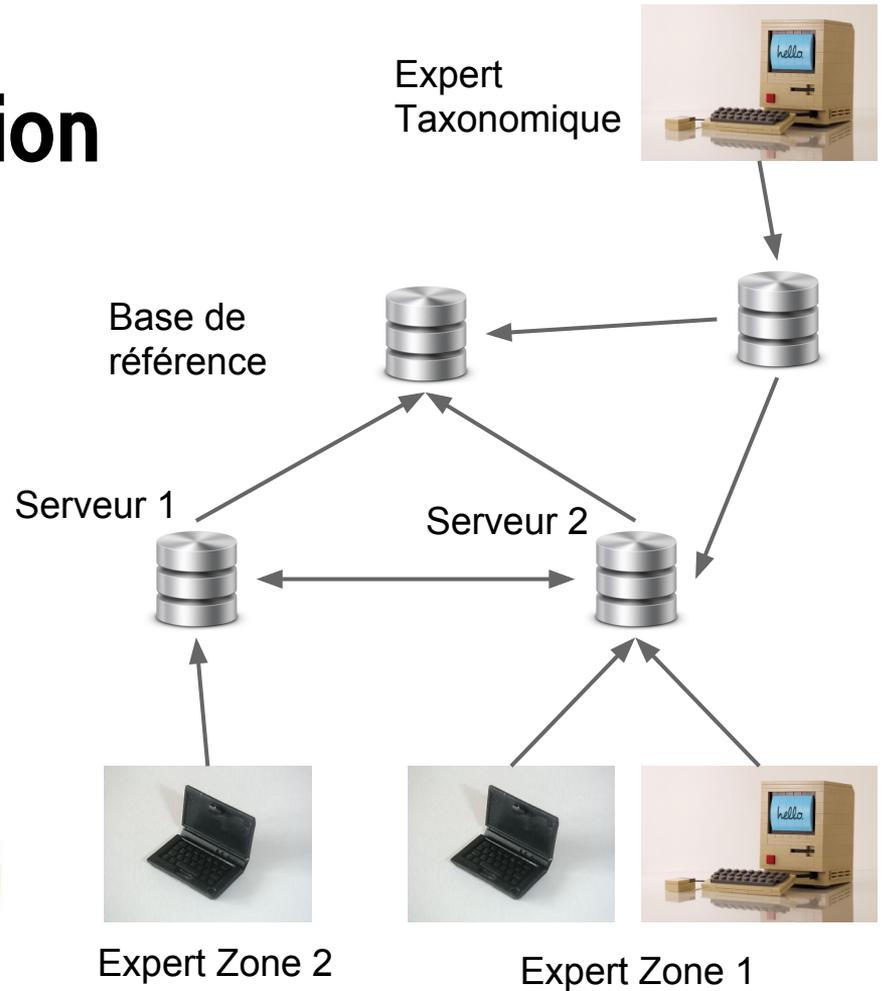

Architecture distribuée

Mode hors ligne

Différents

groupes d'utilisateurs

Detection des conflits

# Appli Web ou Hors ligne

The screenshot shows a web browser window displaying the Pi@ntNet-Datamanager interface. The browser's address bar shows the URL `data.plantnet-project.org/datamanager/_design/datamanager/start.html#/dbs`. The page header includes the logo, version `v0.8.0`, a user profile `@data`, and a `Create a new account` button. A navigation bar contains a `Home` link. The main content area features the title `Pl@ntNet - Datamanager` and a descriptive paragraph: `Pi@ntNet-Datamanager is a distributed data management system dedicated to botany. With this software, you can :` followed by a bulleted list of features: 

- create databases with their own data organisation
- send / Retrieve data to / from other Pi@ntNet-Datamanager instances
- manage your data locally on your computer. Pi@ntNet-Datamanager is decentralized. The software can be installed on servers but also on personal computer or on mobile devices.

A `Help and forums »` button is located below the list. A row of partner logos includes `agroparis-sudparis`, `cirad`, `INRA`, `Inria`, `IRD`, and `Tela Botanica`. A `Sign in` box on the right contains input fields for `Login` and `Password`, and a `Sign in` button. Below this is a `Public database list` section with the text `You can access to those databases without signin.` and a table of database entries.

# Organisation par “structure”

The screenshot shows the DataManager web interface for a database named 'reunion\_observation'. The browser address bar shows the URL: `data.plantnet-project.org/reunion_observation/_design/datamanager/database.html#/db-manager`. The interface includes a navigation menu with 'Database overview', 'Structures: Dictionary', 'Structure', and 'New Structure'. A search bar is present with the text 'Quick Search' and a dropdown for 'Select a structure'. The main content area is divided into sections: 'Database description' (containing the text 'observations from reunion island'), 'Notes / Comments' (containing the text 'Used for demonstration. I can write something here... yes indeed'), 'Available structures' (a table listing structures like 'bdtre', 'geo', and 'pni\_observations'), and 'Last changes' (a table listing document changes with columns for Doc, Author, Date, and Diff).

Database description  
observations from reunion island

Notes / Comments  
Used for demonstration. I can write something here... yes indeed

# Données Tabulaires

The screenshot shows the DataManager web interface. The browser address bar displays the URL: `data.plantnet-project.org/reunion_observations/design/datamanager/database.html#/viewtable/mm_887cfd7a2bcc93466ef9a6daa008b5f/0j_id/0j/0j/0j`. The interface includes a navigation menu on the left with sections for Organization, Modules, Views, and Queries. The main content area is titled "Table view for .obs" and displays a table with the following columns: author, date, location, taxa, and note. The table contains 25 rows of observation data.

# Configuration d'une base

The screenshot shows the DataManager web interface for configuring a database. The browser address bar shows the URL: `data.plantnet-project.org/bourbon12/_design/datamanager/database.html#/editmm/mm_887cfdb7a2bcc93466ef9a6daa0008b5`. The interface includes a navigation bar with 'General', 'Modules', and 'Layout' tabs. The 'Modules' tab is active, showing a list of modules: 'obs' (selected) and 'img\_set'. Below the modules list, there are buttons for 'Add new module', 'Remove module', 'Move up', and 'Move down'. The 'Properties' section for the 'obs' module includes fields for 'Name' (obs), 'Description', and 'Color'. It also has 'Index Template' and 'Label Template' fields. The 'Fields' section contains a table of fields with columns for Name, Display Label, Mandatory, Type, Default value, Hide, and Description. At the bottom, there are 'Save structure' and 'Cancel' buttons.
